Tring Care Limited is committed to achieving net zero emissions by 2024 when we plan to have reduced our emissions by 98%.

Baseline Emissions Footprint vs Current Emissions Footprint

Baseline emissions are a record of the greenhouse gasses that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Objective

To reduce carbon emissions generated by email traffic

Target

Action, Improvement or Control

Educate employees on impact of emails Delete permanently old emails Reduce subscription emails Reduce number of emails sent - is the final thank you email necessary? Consider email signatures and logos as these increase the carbon of every email sent by the company - could the content be reduced?
